

ANDHRA PRADESH PRIORITIES

An India Consensus Prioritization Project

WORKING WITH

30-50 economists including Nobel Laureates, 100+ sector experts engaging government, donor organizations, civil society, development agencies, businesses, youth, across rural and urban areas.

...to identify, analyze and prioritize interventions that will deliver greater benefit per rupee spent, helping move India towards a more prosperous long term future.

A lot of ideas but little prioritization

From all spheres of policy, for example:

- Central Government Plans and Strategy
- State Governments' Five Year Plans
- 1000s of NGOs and development organizations initiating their own programs

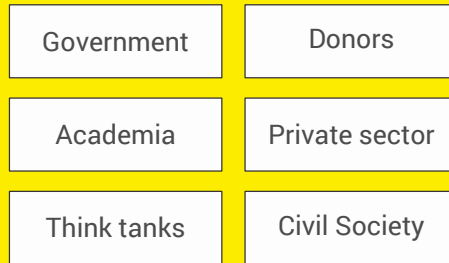

Development expenditures:
Rs 753 billion

We want to give tailwind to good ideas and headwind to bad ones.

Shifting just 1% of spending could generate billions of rupees worth of social, environmental and economic benefits for the state.

2017

Sourcing ideas and solutions

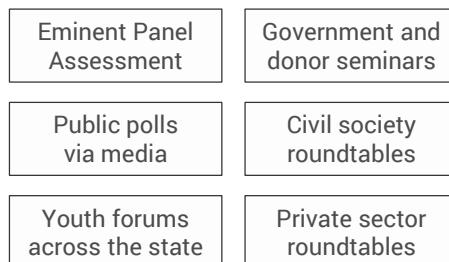

100+ ideas on policies & investments

Complete set of papers on 30-50 solutions

2018

PRIORITIZATION

OUTREACH

Continuous engagement with the public via electronic, print and social media

Working with civil society, government and sector experts

Widely advocating results of prioritization exercises
