A lot of ideas but little prioritization

From all spheres of policy, for example:

- Central Government Plans and Strategy
- State Government Plans and Budgets
- 1000s of NGOs and development organizations initiating their own programs

State budget:

**Rs 1,81,754 crore**

We want to give tailwind to good ideas and headwind to bad ones.

Shifting just 1% of spending could generate billions of rupees worth of social, environmental and economic benefits for the state.
